

SET A HIGHER STANDARD FOR AMD TESTING

The **AdaptDx Pro**[®] leverages dark adaptation testing to aid the detection of age-related macular degeneration (AMD) at its subclinical stage. The earlier your patients get a diagnosis, the longer you can help preserve their vision.

Offering dark adaptation testing with the innovative **AdaptDx Pro** has the potential to enhance patient care and grow your eye care practice.

HIGH-TECH INNOVATION

- Our on-board technician, Theia™, uses artificial intelligence to deliver a uniform experience, every time
- Precision technology automatically aligns with patient's eyes and monitors fixation
- Custom eyecups create a light-proof seal, eliminating the need for a darkroom
- This portable device integrates easily into current workflow
- Highly accurate results that are clear and objective

HIGH-TOUCH PATIENT CARE

- Theia frees up your technician's time for other tasks
- Theia's gentle voice guides patients through the test process
- Multiple language options enable the technician to operate the device in one language and set Theia to speak to the patient in another, including English, Spanish, German, French, and Italian
- The lightweight headset was designed for comfort and ease of use
- Patients can move freely and easily while wearing the headset
- Comfort Guard™ eyecup covers provide a comfortable, hygienic test experience for each patient

HIGH-YIELD PRACTICE

- Reimbursable service using CPT Code 92284 for dark adaptation
- Drive revenue from auxiliary testing, plus nutraceutical and optical sales
- With multiple devices, your technician can facilitate testing on more than one patient at a time with help from Theia
- Elevate practice marketability with cutting-edge technology

Ongoing Support

Each AdaptDx Pro purchase is supported by our **AMD Excellence Program**[®]. Our team guides you through device setup, staff training, workflow integration and business optimization.
